

Galway International Arts Festival

Sustainability Commitments 2022–2025

Vision

Galway International Arts Festival will transition the Festival to a sustainable future by significantly reducing its carbon footprint through the application of event best practices.

Our Goals

We will source 50% of GIAF's total energy requirements from renewable resources by 2025.

We will reduce current waste production by 55% by 2025.

We will establish a baseline carbon footprint.

We will establish partnerships with stakeholders which will support sustainable development.

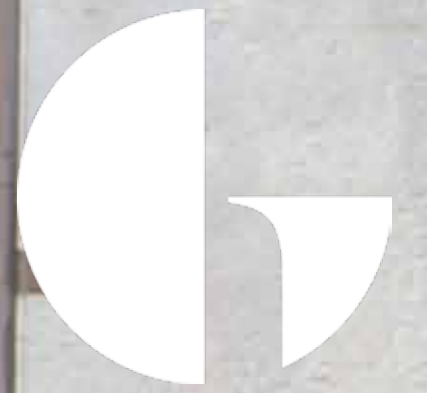

Our Goals

We will promote behaviours in our staff, volunteers and audiences that will reduce their impact on the environment.

We will influence our supply chains with a view to delivering more sustainable options.

We will highlight sustainability issues in our Festival programming.

We will adequately resource the measures required to ensure the above objectives are achieved.

Thank You
